Abstracts

The global IQF Cheese market was valued at 79.71 Million USD in 2021 and will grow with a CAGR of 4.28% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

IQF technology comes with the best solution for this market, with IQF Cheese opening up a large market share for fine cheeses and delicate cheese products. Consumers all over the world are able to buy and consume cheese products that were very exclusive, with the help of IQF technology. Also, IQF Cheese is a new and high quality frozen product that fits very well in the existing frozen product range for ready meals and ready-to-go products such as IQF vegetables, IQF fruits, IQF meat and IQF seafood. IQF Cheese is used for pizza, pasta, salads, antipasti, sandwiches, soups and bakery. There has been a constant growth in the cheese industry over the last 10 years, fueled by the increasing demand for ready to eat meals, healthy snacks, organic cheese as well as higher demands from frozen pizza producers. Future growth in the cheese industry is driven by the increasing demand from the frozen pizza producers. As the IQF Cheese has the advantage of being easy to use and spread by the processors, it is gaining increasing popularity on the market of frozen dairies. Today's consumers ask for convenience, thus manufacturers offer products and packaging solutions that are portable and easy to use. Many manufacturers are trying to make capital on snacking and ready-to-go cheese products as this trend is growing. Manufacturers of IQF Cheese

shred high quality cheese at its peak performance age, and then freeze each piece individually. This process locks in the freshness and stops the aging process, providing foodservice and industrial users with a consistent, high-quality product. IQF Cheeses are well-suited for pizza toppings and unique cheese blends. Foodservice operators simply scoop the free-flowing cheese directly from the box as needed. Innovations such as these enable suppliers to develop new products to meet the latest consumer trends - or start new trends - keeping customers ahead of the competition.
