The global Iris Recognition Access Control System market was valued at 167.53 Million USD in 2021 and will grow with a CAGR of 11.66% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The principle of Iris Recognition Access Control System is to find out the iris data that matches the collected iris from the iris database, and realize the function of opening the door lock by identifying the identity information. The specific design plan of the system: first collect the iris image, and then perform the iris image preprocessing, where the iris positioning is the image preprocessing, and the iris positioning is the key to the image preprocessing, because it is a prerequisite for effective iris recognition, which is to determine The position of the inner and outer edges in the image; adopt a specific algorithm for coding recognition. At this stage, the key is to extract the features of the iris image to be recognized, and compare and determine the features of the iris in the database according to a certain matching algorithm. Then operate the execution state of the door lock, and finally achieve the purpose of identification. Iris recognition access control systems can be divided into recognition speeds of less than 1 second and recognition speeds of more than 1 second. They are widely used in residential, education, finance, commerce, hospitals, government, and military fields. At present, major global manufacturers include IDEMIA, Thales Group, CMITech, EyeLock, IrisKing and HOMSH. In 2019, the share of major manufacturers exceed 60%. It is expected

that industry competition will become more intense in the next few years.
