The global ISO Tank Container market was valued at 76.92 Million USD in 2021 and will grow with a CAGR of 8.82% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

ISO Tank Container is built to the ISO standards, making it suitable for different modes of transportation. Both hazardous and non-hazardous products can be transported in tank containers. For industry structure analysis, the ISO Tank Container industry is very concentrated. These manufacturers range from large multinational corporations to smaller privately owned companies compete in this industry. The top five producers account for about 94.51 % of the revenue market. Regionally, China is the biggest production value area of valves, also the leader in the whole ISO Tank Container industry. China occupied 85.55% of the production market in 2017. It is followed by South Africa which accounted for around 11.17% of the global total industry. Other countries have a smaller amount of production. Geographically, Europe was the largest consumption market in the world, which took about 27.93% of the global consumption volume in 2017. For price trend analysis, a key variable in the performance of ISO Tank Container producers is raw material costs, specifically the speed at which any increase can be passed through to customers. For forecast, the global ISO Tank Container revenue would keep increasing with annual growth rate with 6~13%. We tend to believe that this industry still has a good future, considering the current demand of ISO Tank

Container.
