The global Isobutyronitrile market was valued at 1.82 Million USD in 2021 and will grow with a CAGR of 3.17% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Isobutyronitrile is a complex organic molecule that has been recently found in several meteorites arrived from space. The singularity of this chemical is due to the fact that it is the only one among the molecules arriving from the universe that has a branched, rather than straight, carbon backbone which is larger than usual, in comparison with others. In 2019, the global Isobutyronitrile market is led by China. USA is the second-largest region-wise market. Isobutyronitrile is a niche refined product, and there are mainly five players around the world participating in this market. Wenzhou Lucheng Dongou Dyeing Intermediate, Rudong Tongyuan Chemicals, Eastman, Anhui Chizhou Sincerity Chemicals and AlzChem are major players in the global market. In 2019, Wenzhou Lucheng Dongou Dyeing Intermediate accounted for about 30% of the market share. More than 95% of isobutyronitrile is used to make pesticides, and isobutyronitrile is used to produce diazinon.
