## Abstracts

The global Jellies and Gummies market was valued at 2361.93 Million USD in 2021 and will grow with a CAGR of 2.85% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Jellies and Gummies are candies that have a hard sugar shell with a soft center. There is a clear distinction between a gummy and jelly candy. Gummy candy, as the name suggests, has a gummy texture. Not quite like chewing rubber bands or calamari, but certainly more elastic than any other soft candy. Since gelatin is the only material that gives that texture, by definition, gummies are made with gelatin. Jelly candies are solidified using carbohydrates, not proteins. So, a jelly bean center is usually made with corn starch. Other jelling ingredients are pectin, tapioca, and potato or arrowroot starch. The companies are caring more about their marketing channel, such as using both online and offline channel to promote their products. What's more, they are building the steady relationship with the distributors and meanwhile, searching for new channels, especially to the emerging market.
