The global Kidswear market was valued at .94 Million USD in 2021 and will grow with a CAGR of 4.32% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Kidswear is clothing for children. These colorful clothes are designed for boys, girls and babies with various types like suits, jackets, sweaters, pants, T-shirts, etc. Cotton is the most used material of kidswear due to its characters like sweat-absorbent, soft and comfortable. Wool, fur, linen and silk are also the major fabric materials. United States is the largest consumer with about 21% share of consumption market. While it also supply about 9% of total production in the global market. The population of children is increasing stably and the demand is increasing correspondingly. China is the largest supplier of kidswear with about 25% share of manufacturing market. Products from China are largely exported to US, Europe and other countries. While mass foreign brands products are imported into China at the same time. For the consumption market, foreign brands occupied half of the total value. And domestic brands enjoy about 15%, the last products don't have known brands.
