The global L- Cysteine and Its Hydrochloride market was valued at 430.51 Million USD in 2021 and will grow with a CAGR of 6.55% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

L-cysteine is a proteinogenic amino acid contributing to building protein and includes the element sulphur. It can be synthesised in the human liver and is therefore not an essential amino acid. While L-cysteine hydrochloride is a less popular supplemental form of the amino acid L-cysteine. Currently, there are several companies in the world can produce l-cysteine product, mainly concentrate in China. The main market players are Wacker, Nippon Rika, Ajinomoto, Ningbo Zhenhai Haide Biochem, etc. The production of l-cysteine increased from 12187 Tonnes in 2011 to 14066 Tonnes in 2015, with an average growth rate of 3.72%. Global l-cysteine capacity utilization rate remained at around 83% in 2015. In consumption market, the growth rate of global consumption is smooth relatively with the 3.56% of average growth rate. China and Europe are still the mainly consumption regions due to the advanced production technology and rapid development of economy. L-cysteine product can be classified into two types: L- Cysteine and L-Cysteine Hydrochloride. L-Cysteine Hydrochloride is widely used in food industry, while L- Cysteine mainly used in pharmaceutical industry. Survey results showed that l-cysteine take 32% of the market. Currently, there are two kinds of commonly used production process of l-cysteine. It includes chemical synthesis and

biological fermentation. Due to the different process, the major raw materials for l-cysteine are different. On the global market, supply of raw materials is full. Fluctuations in the price of the upstream product will impact on the production cost of l-cysteine industry. We tend to believe this industry is a mature industry, and the consumption increasing degree will show a smooth growth curve. For product prices, the slow downward trend in recent years will maintain in the future as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.
