L-lysine hydrochloride is an amino acid found in the protein of foods such as beans, cheese, yogurt, meat, milk, brewer`s yeast, wheat germ, and other animal proteins. L-lysine hydrochloride is classified as an essential amino acid for humans and must be supplied in the diet. The average 70 kg human requires 800 to 3,000 mg of lysine daily. First, the L-lysine hydrochloride industry concentration is high; these ten years, many companies expanded their lysine capacity. In the world wide, giant manufactures mainly distribute in USA, China and Europe. Japan has a long history in this industry, Ajinomoto has started commercial production in 1986. In Japan, Brazil, US, Thailand, France the company all has -lysine hydrochloride plant and unique products. As to China, the explosive growth has ended. The quantity of new manufacturers is rapid slowing down. The L-lysine hydrochloride market tends to steady development. Overall, the international market is more stable and rational than that of China now. Second, many companies have several plants, usually close to aimed consumption market. There are international companies setting up factories in China too, such as CJ group set their plant in Shenyang and Liaocheng China. Third, all Manufacturers in the world are committed to the improvement of product. L-lysine hydrochloride industry has a lot

of patents. There are disputes concerning patents between manufacturers all the time. Fourth, the import percent of this industry is not high in China due to the domestic severe overcapacity. Some of the manufacturers` utilization rate is very low. Fifth, company mergers and acquisitions, and inter-companies cooperation have occurred more fiercely for development and growth. Sixth, this industry is affected by environment conditions, economy and policy, so it`s important to put an eye to environment related indexers, economic indexes and leaders` prefer. In view of the present economic and environmental conditions, we predict this industry will have a stable development. On product prices, the slow downward trend in recent years will maintain in the future, as competition intensifies, prices gap between different brands will go narrowing. The gross margin will decrease.
