The global Lab Grinders market was valued at 43.06 Million USD in 2021 and will grow with a CAGR of 3.75% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Laboratory grinders are employed to prepare samples for analysis. They are used for obtaining fine, coarse, or ultra-fine particles of a material, in either continuous or batch operations. The output of laboratory grinders is fine and perfectly homogenized specimens used in physical and chemical analyses. An accurate and reliable product analysis can be performed only when a high-quality sample is obtained from Laboratory grinders. Laboratory grinders are used in both dry grinding and wet grinding. While selecting a laboratory mill, it needs to be ensured that properties of the material are not altered during grinding. Global Lab Grinders key players include Retsch, IKA, MRC Lab, Fritsch, Brabender, etc. Global top five manufacturers hold a share over 30%. America is the largest market, with a share about 50%, followed by Europe, and Asia Pacific, both have a share over 55 percent. In terms of product, Ball Mill is the largest segment, with a share nearly 45%. And in terms of application, the largest application is Bio & Pharmaceutical, followed by Agriculture & Food, Chemical Material, etc.
