The global Laboratory Water Purifier market was valued at 37.23 Million USD in 2021 and will grow with a CAGR of .5% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Laboratory water purifier is used to remove impurities, salt ions, bacteria and viruses from water in the laboratory. The processes include capacitive deionization, reverse osmosis, carbon filtering, microfiltration, ultrafiltration, ultraviolet oxidation, or electro deionization. In consumption market, the growth rate of global consumption is smooth relatively with the 2.16% of average growth rate. USA and Europe are still the mainly consumption regions due to the advanced production technology and rapid development of economy. We tend to believe this industry is saturated industry, and the consumption increasing degree will show a smooth growth curve. For product prices, the slow downward trend in recent years will maintain in the future as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.
