## Abstracts

The global Land Mobile Radio (LMR) System market was valued at 1630.56 Million USD in 2021 and will grow with a CAGR of 5.8% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Land mobile radio (LMR) system is a regularly interacting group of radio base, mobile, and associated control and fixed relay stations intended to provide LMR communications service over a single area of operation. The term mobile refers to movement of the radio, rather than association with a vehicle; hence mobile radio encompasses handheld and portable radios. With the migration from analogue to digital technologies forecast to gather pace in the coming years, many countries are seeking to upgrade their communications systems to a digital solution. This migration presents a significant opportunity for infrastructure and system integration suppliers as these new networks are selected and rolled out.
