Abstracts

The global Laser Capture Microdissection market was valued at 124.87 Million USD in 2021 and will grow with a CAGR of 6.07% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Laser capture microdissection (LCM) is an automated sample preparation technique that enables isolation of specific cells from a mixed population under microscopic visualization. This technique of isolating a pure sample from a heterogeneous mixture allows for more efficient and accurate results with downstream microgenomics applications such as next-generation sequencing, Sanger sequencing, PCR, and proteomic. Global giant manufactures mainly distributed in Germany. The manufacturers in Germany have a long history and unshakable status in this field. Manufacturers such as leica microsystems have relative higher level of product's quality. As to Germany, leica microsystems has become as a global leader. There is only one company in USA, it occupy about 15% of the global production market share. But it has a large amount of consumption. Many companies have several branch office, usually locate in the place close to aimed consumption region. There are international companies set up branch office in China either. Some companies usually take a joint venture enter into aim market, like leica microsystems who take their advantage merge with US company, whose key market is in US. The key consumption markets locate at developed countries. The North America takes the market share of about 30%, followed by EU with

25%. China takes the market share of about 20% We tend to believe this industry becomes more and more mature, and the consumption increasing rate will show a smooth curve.
