Abstracts

The global Laser Direct Imaging (LDI) Equipment market was valued at 678.44 Million USD in 2021 and will grow with a CAGR of 2.4% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The Laser Direct Imaging (LDI) Equipment offers auto focus capabilities so that the system can handle different thicknesses of material and rapid job change-overs without expensive tooling. Using LDI to create the circuit traces gives the PCB manufacturers a lot of advantages, most of them pertaining to weaknesses of using a Photo-tool. Eliminating the need of a Photo-tool removes alignment issues, light refraction issues, and those imperfections related to environmental variations. Also, with LDI, PCB factories can achieve the development of images that require more precision, and resolution, due to the computer's enhanced optical alignment, that automatically compensates distortion on the materials. Changes to the required images, are also easier to achieve with LDI: with the traditional approach, the smallest mistake on the Photo-tool, required the factory to produce a new one, wasting time and money; however, with LDI, these changes became a matter of updating the design file, which can be done more consistently and cost-effectively. In terms of region, the largest segment of Laser Direct Imaging (LDI) Equipment Market would be Asia Pacific, with a market share of over 74% in 2019. The follower is North America accounted for nearly 13% of global market. For the major players of Laser Direct Imaging (LDI) Equipment,

Orbotech maintained its first place in the ranking in 2019. Followed by ORC Manufacturing, SCREEN, Via Mechanics, Manz etc.. The Top 5 players accounted for about 59% of the Laser Direct Imaging (LDI) Equipment revenue market share in 2019.
