The global LED-Based Lamps Used in Explosion-Proof Lighting market was valued at 53.27 Million USD in 2021 and will grow with a CAGR of 7.93% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Explosion-Proof Lighting (also known as hazardous location lighting and intrinsically safe lights) are lighting products, which are certified in accordance with and compliant to International regulative bodies and compliant to recognized safety standards. In North America, total LED-Based Lamps Used in Explosion-Proof Lighting accounted for 26.57%. In the Europe 27.45%, in Asia-Pacific 35.53%, in Latin America 4.73% and in Middle East and Africa 5.71%. Among all regions, Asia-Pacific is estimated to represent the highest share. In terms of value, the Asia Pacific (APAC) region is forecast to grow at a faster pace versus other regions during the forecast period, driven by use of the LED lamps in the commercial/ industrial (factory) application. The American region (South, Central and North America) region, pushed initially by the mining and oil-related sub-applications and is forecast later-on to hold strong market positions in commercial/industrial, mining/oil-related, as well as the military and transportation-oriented sectors. The Europe, Middle East and African (EMEA) region, driven by its use of explosion-proof lighting in the oil-related industry, is forecast for slightly faster growth than the American region.
