Light Emitting Diode (LED) is a solid-state semiconductor device, which can convert the energy from an electric current into light. LED chip is a core component of LED, referring to the PN junction. The LED Flip Chip is a new technology and the global Commercial Production Date is about 2013. The Production of LED Flip Chip is very few before 2013. Many companies are in the stage of research and development. Some companies in the sample are also not mass production. So they are not in this report. Now the key players in LED Flip Chip market are Lumileds, NiChia, Lextar (AU Optronics), Genesis Photonics, Epistar, San`an Opto, ETI, Lattice Power, HC SemiTek and so on. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive. The study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.
