Abstracts

The global LED Thermal Products market was valued at 1975.54 Million USD in 2021 and will grow with a CAGR of 10.88% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Most of the electricity in an LED becomes heat rather than light (about 70% heat and 30% light). If this heat is not removed, the LEDs run at high temperatures, which not only lowers their efficiency, but also makes the LED less reliable. Therefore, LED Thermal Products are used to remove or decrease the heat that created by LED. The automotive lighting market is growing steadily. The 2015 market size is estimated approximately 3.06 percent of total market. This is expected to drop to 2.88 percent of total market by 2021.
