Abstracts

The global LiDAR technology market was valued at 1446.8 Million USD in 2021 and will grow with a CAGR of 13.15% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Lidar is a surveying method that measures distance to a target by illuminating the target with pulsed laser light and measuring the reflected pulses with a sensor. Differences in laser return times and wavelengths can then be used to make digital 3-D representations of the target. The name lidar, now used as an acronym of light detection and ranging (sometimes light imaging, detection, and ranging), was originally a portmanteau of light and radar. Lidar sometimes is called laser scanning and 3-D scanning, with terrestrial, airborne, and mobile applications. Increasing usage of drones across various applications, such as aerospace and defense, agriculture, and forestry, is a major factor driving the market growth. Moreover, rising investments in R&D of self-driven cars in the automotive sector are expected to positively impact the market. LiDAR or Light imaging, detection, and ranging system, has always been synonymous with automotive technology. The escalating demand for driverless cars is providing the automobile industry with ample opportunities to embed LiDAR in their systems. Massive investments from venture capitalists and the flurry of partnerships and acquisitions happening in the LiDAR domain hints on the size of this burgeoning market. Attributed to the rising demand for driverless cars, and the increasing application of LiDAR in

engineering projects, the investments in LiDAR market is accelerating at an exponential pace. Increasing defense expenditure in Asia Pacific is expected to grow the market in region over the forecast period. North America is expected to lead the market, pursued by Europe in following years.
