A linear actuator is an actuator that creates motion in a straight line, in contrast to the circular motion of a conventional electric motor. Linear actuators are used in machine tools and industrial machinery, in computer peripherals such as disk drives and printers, in valves and dampers, and in many other places where linear motion is required. Hydraulic or pneumatic cylinders inherently produce linear motion. Linear Actuators manufacturers range from large multinational corporations to small privately owned companies in this industry. The leading players are Parker, Emerson, LINAK, THK, ABB, accounting for 20.09 percent revenue market share in 2018.
