The global Low Voltage DC-DC LED Drivers market was valued at 51.86 Million USD in 2021 and will grow with a CAGR of 8.08% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Due to increasing energy regulations, most people are familiar by now with the long life spans and energy savings associated with LEDs, or light-emitting diodes. And these innovative light sources require specialized devices called LED drivers to operate. LED drivers (also known as LED power supplies) are similar to ballasts for fluorescent lamps or transformers for lowvoltage bulbs: they provide LEDs with the electricity they require to function and perform at their best. LED drivers convert higher voltage, alternating current to low voltage, direct current. They also keep the voltage and current flowing through an LED circuit at its rated level. This report studies the Low Voltage DC-DC LED Drivers market. Asia-Pacific has the largest global sales in Low Voltage DC-DC LED Drivers market, while the North America is the second sales volume market for Low Voltage DC-DC LED Drivers in 2017. In the industry, Texas Instruments profits most in 2017 and recent years, while Linear Technology and Diodes Incorporated ranked 2 and 3. The market share of them is 24.31%, 11.24% and 8.90% in 2017. The gap of market share is keep on enlarged due to different strategy.
