Lutetium oxide, a white solid, is a cubic compound of lutetium sometimes used in the preparation of specialty glasses. It is also called lutecia. It is a lanthanide oxide, also known as a rare earth. At present, the global Lutetium Oxide market is dominated by Chinese enterprises. China is the world's largest production area of Lutetium Oxide. In 2016, China accounted for 96% of the global production share. China, North America, Europe and Japan are the world's leading consumer regions. However, the consumption of downstream enterprises is dispersed and unstable. Chinese companies and the government's bargaining power is weak, the market price is not dominated by manufacturers. In 2016, global Lutetium Oxide production was estimated at 81.5 tonnes. The global Lutetium Oxide revenue market is estimated at 51 million USD. China Minmetals Rare Earth is the world's largest producer. At present, the company holds 40% of the global production share. In 2011-2016, the global Lutetium Oxide prices have decreased significantly. However, in the past few months, the prices of Lutetium Oxide act certain degree of recovery.
