Lyocell, derived from cellulose, is known as a man-made fiber. It is popularly known by the brand name 'Tencel'. Lyocell, a type of rayon fiber, is manufactured in a closed-loop method through a solvent spinning technique, wherein the cellulose undergoes a limited chemical change. Lyocell fibers are widely used in the textile industry in a broad range of apparels and home textiles. These fibers are also used in the medical industry in the production of medical equipment and surgical products. Currently, only two companies have the ability to produce lyocell fiber product commercially, mainly concentrating in Europe, USA and China. As for the consumption region, China and Other Asian regions are the major consumers. In 2016, China consumed 81.1 K MT lyocell fiber, holding 36.43% share globally.
