Coolant systems pump liquids to cool and lubricate work pieces and cutting tools. A coolant system removes excess heat from an engine. When the engine burns fuel, only one third of the released energy goes into mechanical energy to machines, and the rest is converted to heat. To safeguard an engine from this heat, a coolant system is used. Geographically, the global Machine Tool Coolant System market has been segmented into North America, Europe, Asia-Pacific, South America and Middle East and Africa. The Asia-Pacific held the largest share in the global market, its revenue of global market exceeds 57% in 2017. The next is Europe.
