Maglev Wind Power Generator is a sort of mini wind turbine generator that used for small scale power systems such as street illumination and off-grid house power supply where power supply ranges from 300W-3kW is in need. The market of Maglev power generator keeps steady in the recent few years. Meanwhile the export volume has been increased due to the rising need of off grid power supply. Getting less support from the China government compared with solar industry and large wind turbine industry, the maglev wind turbine manufacturers are facing a shortage of domestic individual consumers. The manufacturers might consider building plants other than finding distributors in South East Asia.
