The global Magnesite and Brucite market was valued at 408.79 Million USD in 2021 and will grow with a CAGR of 4.21% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

The eighth most abundant element in nature, magnesium constitutes 2.4 percent of Earth's crust. Because of its strong reactivity, it does not occur in the native state, but rather it is found in a wide variety of compounds in seawater, brines, and rocks. Among the ore minerals, the most common are the carbonates dolomite (a compound of magnesium and calcium carbonates, $MgCO_3 \cdot CaCO_3$) and magnesite (magnesium carbonate, $MgCO_3$). Less common is the hydroxide mineral brucite, $Mg(OH)_2$, and the halide mineral carnallite (a compound of magnesium and potassium chlorides and water, $MgCl_2 \cdot KCl \cdot 6H_2O$). This report mainly covers magnesite and brucite. It has a silvery-white colour and tarnishes slightly in air. The Magnesium raw materials concentration is very high; there are major manufacturers in China. The manufacturers in China have a long history and unshakable status in this field. Manufacturers such as Magnezit have relative higher level of product's quality. As to China, Haicheng Megnesite has become as a global leader in the magnesite, Dandong Jinyuan has become as a global leader in the brucite. The China take almost a half of the whole revenue market share.
