The global Magnetic Couplings market was valued at 118.82 Million USD in 2021 and will grow with a CAGR of 1.76% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

This report studies the Magnetic Couplings market. Magnetic couplings are non-contact couplings that use a magnetic field to transfer torque, force or movement from one rotating member to another. The transfer takes place through a non-magnetic containment barrier without any physical connection. The couplings are opposing pairs of discs or rotors embedded with magnets. The leading manufactures mainly are EagleBurgmann, ABB, DST, Rexnord and Tridelta. EagleBurgmann is the largest player; its revenue of global market exceeds 3.5% in 2017. There are mainly two type product of magnetic couplings market: disc-type coupling and synchronous coupling. Synchronous coupling accounts the largest proportion. Geographically, the global magnetic couplings market has been segmented into USA, Europe, China, Asia (Ex China) and other. The USA held the largest share in the global magnetic couplings products market, its revenue of global market exceeds 38.5% in 201. The next is Europe and China. China being the most populous country has fast growing magnetic couplings market.
