Abstracts

The global Magnetic Reed Switch market was valued at 27.88 Million USD in 2021 and will grow with a CAGR of 12.76% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Magnetic Reed Switch consists of a pair of ferromagnetic reeds, which overlap at their free ends (contact area) at a very small distance and are hermetically sealed in a glass tube. When in the presence of a magnetic field, the reeds become magnetized to opposite polarity, thus attracting each other and closing contact. Like many other great inventions, reed switches were born at Bell Laboratories, invented there in the mid-1930s by Walter B. Elwood. Today, reed switches are still in common uses. The main market players are OKI, Littelfuse, RMCIP, Standex-Meder, Nippon Aleph, HIS Sensing, Coto, PIT-RADWAR, PIC, STG, Harbin Electric Group, Zhejiang Xurui Company and etc. North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Magnetic Reed Switch. Europe also plays important roles in global market, with market size of 39 million USD in 2017 and has a market share about 14.5%. The Asia-Pacific will occupy for more market share in following years, especially in Japan (with a revenue market share 30.7%) and China (with a revenue market share 16.3%). Demand is driven by demographics and the health of the economy. The profitability of individual companies depends on their ability to bid accurately, secure

contracts, and control costs. Large companies enjoy economies of scale in financing and the ability to offer a broad range of services in many locations. Smaller companies can compete effectively by specializing in particular services or focusing on certain geography. The industry is fragmented. Despite fierce competition, due to the global recovery trend, investors are still optimistic about this area; more new investment will enter into this field in future.
