## Abstracts

The global Makeup Remover market was valued at 1695.71 Million USD in 2021 and will grow with a CAGR of 3.27% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Most makeup removers are harmless for your skin, but ingredients matter. Although quick and easy to apply, many makeup removers contain active cleansing ingredients, which may remain on the skin unless washed off. The color cosmetics industry across the globe is undergoing a positive change with the introduction of new cosmetic products by cosmetic manufacturers. This has given a push to the increasing use of cosmetics by different age groups. The increasing percentage of working women has risen since the past decade. This has prompted the use of various makeup products for eyes, lips and overall face.
