Maltobionic acid, the fourth generation of fruit acid, is a new type of multiple hydroxyl group, which is derived from natural maltose fermentation. The structure of lactose acid is mild and friendly to the skin and helpful for skin care. Maltobionic acid can improve the translucency and toughness of the skin, effectively improve the fine lines and rough condition of the skin, and help the skin to strengthen the compactness and elasticity; the molecular structure of maltose acid has the structure of milk sugar, which can increase the glycosaminoglycan, strengthen the hydration of the skin, and let the skin touch The feeling will become fuller and smoother. Because of the strong substitutability, this market is relatively concentrated, there are few manufacturers all over the world, such as Evonik, Reliable Biopharmaceutical, Bio-sugars Technology, Global Calcium, etc. Among them, Reliable Biopharmaceutical is the largest player with a wide product category. It accounts for close to 50% of the global total. In the world, the consumption areas of Maltobionic Acid are mainly North America, Europe, and China. North America is the largest consumption area in the world, which accounts for over 45% of the total share. Maltobionic Acid can be used in both Facial and Neck care and Body care.
