The global Manipulators market was valued at 31.61 Million USD in 2021 and will grow with a CAGR of 4.31% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An manipulator is a machine with a rigid steel manipulator arm that allow complex pneumatic tilts and rotations, even when the product being moved is handled outside it's center of mass. A human operator controls the machine, allowing for easy and precise movement of the manipulator to lift, lower and otherwise transport a product. Global Industrial Manipulators Market is expected to grow at a significant CAGR in the upcoming years as the scope and its applications are rising enormously across the globe. Industrial manipulators are also termed as robotic manipulators are a mechanical machine that consists of a rigid steel manipulator arm that allows complex pneumatic tilts and rotations without making direct contact. This machine is exclusively used to handle bio-hazardous or radioactive objects that are difficult for a person to handle, in various industries for lifting heavy objects. The automotive industry accounted for a major share in the Industrial Manipulators market due to rise in adoption of industrial robotic solutions by various automotive manufacturers over the past few years. As a result, the automotive industry alone accounted for almost one fourth of the market share by end-user industry in the global market in 2017. Further, the increase in demand for commercial and passenger vehicles, especially in the Asian market is

anticipated to provide numerous opportunities for the robotic arm manufacturers in automotive industry. Thus, the automotive industry is projected to remain dominant in the coming years.
