Medical ultra high molecular weight polyethylene (UHMWPE or UHMW), is a kind of thermoplastic polyethylene chemical materials, which has high molecular weight over 1.5million as usual. Medical ultra high molecular weight polyethylene offers a unique combination of wear and corrosion resistance, low friction surface, and impact strength. Ethylene is the main raw material for the production of medical ultra-high molecular weight polyethylene (UHMWPE). Most ultra-high molecular weight polyethylene (UHMWPE) manufacturers produce raw material by themselves and some companies need to buy from large refinery companies. The consumption of medical ultra-high molecular weight polyethylene (UHMWPE) is mainly in USA, Europe . Europe is the largest consumer in the global. This industry is affected by the economy and policy, so it's important to put an eye to economic indexes and leaders` prefer. With the global economic recovery, more and more people pay attention to rising environment standards, especially in underdevelopment regions that have a large population and fast economic growth, this will cause a certain pressure to the industry
