The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A MEMS microphone is a tiny device that employs a pressure-sensitive diaphragm etched on a semiconductor, generally less than 1 millimeter, that can be incorporated directly onto an electronic chip and commonly uses a small thin membrane fabricated on the chip to detect sound. A MEMS microphone is composed by a diaphragm vibrating between two holed back-plates. MEMS microphones target all audio applications where small size, high sound quality, reliability and affordability are key requirements. This industry is centralized. Top 3 companies in the market occupies about 72.05% of the Revenue market shares in 2015. The major manufacturers of sport bottle are Knowles, Goertek, AAC, ST Microelectronics, BSE, NeoMEMS, Hosiden and others.
