Abstracts

The global Metal Tube Rotameter market was valued at 47.93 Million USD in 2021 and will grow with a CAGR of 5.15% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Metal Tube Rotameter is basically a variable area flow meter. The differential pressure across the annulus area is constant and the flow rate is measured as a function of the position of annulus area created by float position. The position of the float is sensed by a magnet and indicated on the dial in terms of flow rate. Europe was the largest consumption market with a market share of 25.83% in 2012 and 25.07% in 2017 with a decrease of 0.76%. North America and China ranked the second and third markets with the market share of 20.72% and 20.83% in 2016. The Metal Tube Rotameter market has been increased in accordance with the development of whole economy, technology and emerging application. As a whole, with the emphasis on environmental protection and people's awareness of environmental protection, new energy development is rapid, instead of part of the petrochemical industry. So, chemical, oil and gas and petrochemical industry investment will continue to slow down, but there are some food and beverage, medicine, nuclear power and municipal growth and other industries is still optimistic in the future. The Metal Tube Rotameter market competition will be more intense.
