Propylene glycol monomethyl ether acetate (PGMEA/PMA), also known as propylene glycol methyl ether acetate, is a colorless hygroscopic liquid with a special odor. It is a non-polluting solvent with multi-functional groups. Its molecular formula is C₆H₁₂O₃. It is mainly used as a solvent for printing ink, paint, textile dyes, and textile oil. The electronic grade, which is further purified, can be used as the photoresist solvent and cleaning agent in the production of semiconductor and liquid crystal displays. PGMEA/PMA is flammable, and when the temperature is above 42°C, it may form explosive vapor/air mixture. Propylene Glycol Methyl Ether Acetate (PGMEA) for Electronic Materials production market is relatively concentrated. Europe is the Major Production area as well as the leading consumption market. However, small players in other areas like China and Japan are growing fast in recent years, and they are seeing to keep the growing trend in the next forecast decade.
