Methyl Glucose is a monosaccharide prepared in research laboratory through acid-catalyzed reaction of methanol and glucose. It is widely utilized as a chemical intermediate for generating products or derivatives that serve the cosmetics & personal care industry as thickening agents, humectants, emollients, moisturizers, and emulsifiers. Methyl glucose market products find increasing application in hair care, moisturizing creams, body wash, lotions, baby care, cleansers, and other skincare products. Factors such as non-toxic and non-irritant nature along with their ability to form stable emulsions supporting product demand. Methyl glucose can be used in both personal care and cosmetics. Personal Care is the main application field, accounting for 63% of the global share. With strong downstream demand, Asia-Pacific is the largest consumption region of methyl glucose, with consumption share of 47% globally in 2019. This market is relatively dispersive, there are many manufacturers all over the world, such as Hangzhou Lingeba Technology, Tinci, TIM Chemical, Reachin, Lubrizol and KCl, etc.
