Micro turbine is a relatively new distributed generation technology being used for stationary energy generation applications. It is a type of combustion turbine that produces both heat and electricity on a relatively small scale. Currently, some companies in the world can produce micro turbine product, mainly concentrating in USA. The main market players are Capstone Turbine, Ansaldo Energia, FlexEnergy, IHI, etc. Capstone Turbine is a global leader of this industry, with global sales market share of 71.07% in 2015. The global production of micro turbine decreased from 765 units in 2011 to 394 units in 2015, with an average growth rate of -47.88%. The one reason for the decreasing situation is the backward technology for produce micro turbine. In consumption market, Europe and USA are still the mainly consumption regions due to the advanced production technology and rapid development of economy. At present, in developed countries, the micro turbine industry is generally at a more advanced level. Some companies is developing micro turbine, they will enter this field in the future.
