The global Milk Protein Concentrate (MPC) market was valued at 1023.3 Million USD in 2021 and will grow with a CAGR of 2.99% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Milk protein concentrates (MPCs) are complete dairy proteins (containing both caseins and whey proteins) that are available in protein concentrations ranging from 40% to 90%. MPCs are used for their nutritional and functional properties. Milk Protein Concentrate (MPC) production is a raw material dependent industry. Currently, there are a few producing companies in the world. The main market players are Fonterra, Westland, Danisco Ingredients, and Idaho Milk. The production of Milk Protein Concentrate (MPC) increased to 188469 MT in 2017 from 160332 MT in 2012 with an average growth rate of about 4.2%. Global Milk Protein Concentrate (MPC) market size is expected to reach 237945 MT in 2023. In consumption market, USA and Europe are the mainly consumption regions due to the bigger demand of downstream applications. Milk Protein Concentrate (MPC) could be applied in many fields, such as cheese and nutrition products applications, yogurt, ice creams, nondairy products and others. With the development of economy, the downstream application industries will need more Milk Protein Concentrate (MPC). The major raw materials of Milk Protein Concentrate (MPC) are fresh milk or filtered milk. Fluctuations in the price of the upstream product will impact on the production cost of Milk Protein Concentrate (MPC), and then impact the

price of Milk Protein Concentrate (MPC) and its consumption. We tend to believe this industry is keeping a gentle growing industry, and the consumption increasing degree will show a smooth growth curve. And the price presents fluctuation trend according to the economy development status. Also, there will be fluctuation in gross margin.
