Mineral insulated (MI) heating cable is a type of heating cable with semi-rigid resistance wire and magnesia (mineral) insulating layer. Mineral Insulated heating cables are used where high power output, high exposure temperatures, or extreme resistance to environmental corrosives are needed. Mineral insulated heating cable is mainly classified into two types: single conductor, double conductor. And single conductor is the most widely used type which takes up about 64% of the global total in 2016. China is the largest consumption country of mineral insulated heating cable in the world in the past few years and it will keep the same position in the next few years. Chinese market took up about 29% the global market in 2016, followed by Europe (27%), and North America is followed with the share about 24%. SST is the largest supplier of mineral insulated heating cable in Russia, and it took about half of the Russian market while the Russian market is about 8.6% of the global total market. Other key suppliers are Raychem, Anhui Huanrui, Thermon, Bartec, Wuhu Jiahong, Emerson, Eltherm, etc. in Russia.
