The global Mobile Water Treatment market was valued at 8.78 Million USD in 2021 and will grow with a CAGR of 10.37% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Mobile water treatment systems are ideal for fast response, emergency situations, supplemental, or temporary requirements. They are often used to assist industrial customers during plant start up and maintenance outages when the plant's water treatment system is unavailable or cannot meet the water production requirements. Mobile water treatment suppliers can provide rental service which include rapid response service, short term temporary services and long term service. The market for mobile water treatment system has traditionally been limited to the developed geographies, such as Americas and Europe; hence the global emerging regions of Asia Pacific and Middle East offer huge untapped potential. Most companies are looking at attaining first mover advantage in these regions. GE Water and Process Technologies, Evoqua Water, Veolia Water are the key players in the world market. The rest of the market is relatively fragmented and serviced by regional companies. It has mostly grown through consolidation, along with mergers and acquisitions. As funding opportunities become available, demand for mobile water treatment systems is likely to increase since these systems offer rapid response to emergency purified water in these situations. Huge capital investments, technological innovations and logistics to meet

customer needs remain the most critical factors for vendors to consider.
