The global Molybdenum Powder market was valued at 65.73 Million USD in 2021 and will grow with a CAGR of 4.67% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Molybdenum (Mo) is a silvery-white shiny metal, hard but at the same time softer and more flexible than tungsten. It has an excellent resistance to corrosion, good wear and resistance to abrasion, and superior thermal and electrical properties. It is an essential element when it comes to alloys, as it enhances hardenability and persistence of tempered and destroyed steels. Molybdenum Powder product demand market has a certain space, but basically showing the scarcity of high-end products, low-end products, excess capacity, there is a large market demand for high-end products to seize market share, local enterprises export more low-end products over capacity or molding process basic Materials. In 2016, Europe is the largest supplier with Production market share of 35.69% in 2016, and Europe is the consumption market of Molybdenum Powder with Consumption market share of 34.75% due to the great demand. In recent years, the price of Molybdenum Powder is increasing slowly due to the limited resources.
