Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Monocyanamide (CN_2H_2) is an organic compound, easily soluble in water, ethanol, ether, benzene, chloroform, acetone, etc. It is widely used in agriculture and the production of pharmaceuticals and other organic compounds. At present, around 90% of the global cyanamide manufacturers are mainly concentrated in China, among which Jiangsu Deda, Yifeng Biochemical, Ningxia Darong, other leading companies have exported their products to Europe, American, the Asia-Pacific region. Manufacturers in the industry should strengthen the level of lean management, through the control of raw material quality and reaction rate, continuously improve product yield, reduce product unit cost, improve the company's product market competitiveness. As for the consumer market, the growth rate of global consumption is smooth relatively. North America, China, Europe are still the main consumption regions due to the advanced production technology and rapid development of the economy. Based on product types, 30% and 50% cyanamide solutions and 95% cyanamide crystals are common on the market. Among them, crystalline cyanamide is mainly used for the synthesis of medicines, health products, feed additives, pesticide chemical intermediates, 25% cyanamide solution is mainly used for creatine production.
