Abstracts

The global Montelukast Sodium market was valued at 18.81 Million USD in 2021 and will grow with a CAGR of 10.56% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Montelukast sodium is a hygroscopic, optically active, and white to off-white powder. Montelukast sodium is freely soluble in ethanol, methanol, and water and practically insoluble in acetonitrile. It is administered orally for prophylaxis and chronic treatment of asthma, exercise-induced bronchoconstriction, and allergic rhinitis. The major raw material for montelukast sodium is 7-chloroquinoline, isophthalaldehyde, etc. On the global market, supply of raw materials is relatively full. Fluctuations in the price of the upstream product will impact on the production cost of montelukast sodium industry. We tend to believe this industry is an emerging industry, and the consumption increasing degree will show a rapid growth curve. For product prices, the slow downward trend in recent years will maintain in the future as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.
