The global Motor Controllers market was valued at 802.09 Million USD in 2021 and will grow with a CAGR of 17.76% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A motor controller is a device or group of devices that serves to govern in some predetermined manner the performance of an electric motor. A motor controller might include a manual or automatic means for starting and stopping the motor, selecting forward or reverse rotation, selecting and regulating the speed, regulating or limiting the torque, and protecting against overloads and faults. In the coming years there is an increasing demand for motor controllers in the regions of North America and Europe that is expected to drive the market for more advanced motor controllers. Increasing of automotive used fields expenditures, especially for electric vehicles, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of motor controllers of APAC will drive growth of the market. Globally, the motor controllers industry market is not very concentrated as the manufacturing technology of motor controllers is relatively matures than some high-tech equipment. And some enterprises, like Mitsubishi, Yaskawa, Rockwell and Fanuc etc. are well-known for the wonderful performance of their motor controllers and related services. At the same time, Asia-Pacific, occupied 36.90% revenue market share in 2017, is remarkable in the global motor controllers industry because of their market

share and technology status of motor controllers. The consumption volume of motor controllers is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of motor controllers industry may not keep that fast. But it is surely forecasted that the market of motor controllers is still promising.
