The global Moving Bed Bioreactor (MBBR) market was valued at 1388.19 Million USD in 2021 and will grow with a CAGR of 11.55% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography (North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Moving Bed Bioreactor (MBBR) is a new form of water treatment solution, which is growing rapidly in terms of usage, particularly in developed countries. MBBRs are cheaper than some solutions available in the market such as membrane biofilm reactors (MBRs). They occupy less area in comparison, one-third of the area occupied by activated sludge process treatment. MBBR is suited best in this regard offering a smaller carbon footprint, unrivaled efficiency in water treatment needed for industrial firms/municipalities to meet the stringent pollutant discharge limits. MBBR also provides cost effective replacements of older systems, while simultaneously providing superior efficiency and capacity utilization of existing infrastructure, thus helping preserve investments in plant infrastructure and hence ideally suited for upgrade and capacity expansion of existing wastewater treatment plants.
