The global MS Resin (SMMA) market was valued at 4.14 Million USD in 2021 and will grow with a CAGR of 6.57% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

MS Resin, also known as SMMA, is a transparent copolymer primarily composed of methyl methacrylate (MMA) and styrene monomer (SM). It has excellent transparency, optical property, good weather-resistivity, easy to process, low hygroscopicity, low residual stress for molded products, and therefore economical for many applications. Currently, the key factors driving the growth of the aforementioned industry are optical materials, toys, house appliance such as food container, lamp shade, and other industries. As the demand increases rapidly for house appliance industries, and the wider range of applications, the demand for MS Resin will correspondingly increase. The increased consumption of MS Resin is expected to continue during the remaining years of the forecast period of 2018-2023. MS Resin industry will usher in a stable growth space. Besides, MS Resin is an alternative for Acrylic, this demanding will also drive the consumption to increase.
