The global Multi-Parameter Patient Monitoring Equipment market was valued at 376.66 Million USD in 2021 and will grow with a CAGR of 3.63% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Multi-parameter patient monitoring equipment is a special device that is used for keeping track of the vital signs of patient's health. This patient monitoring equipment is generally used in different hospital departments to monitor patients in their beds. The equipment measures blood pressure, etc. temperature, respiration rate and other data. If we speak of specialized versions, they include cardiac and fetal output, as well as neuromuscular monitors. The classification of Multi-parameter Patient Monitoring Equipment includes High-acuity Monitors, Mid-acuity Monitors and Low-acuity Monitors. The revenue proportion of High-acuity Monitors in 2017 is about 54.7%, Low-acuity Monitors is the fastest developing department. Europe countries are to improve care in low-acuity wards, as it will allow patients to be moved from expensive high-acuity wards sooner, while still being monitored to ensure they receive any necessary care. This is leading to demand for low-acuity monitors, to ensure all patients are monitored at all times. Multi-parameter Patient Monitoring Equipment is applied in Hospital and Home Health Care. The most of Multi-parameter Patient Monitoring Equipment is used in Hospital, and the market share in 2017 is about 67.9%. North America is the largest consumption place, with a revenue market share nearly 41.8% in 2017. Following North

America, Asia-Pacific is the second largest consumption place with the revenue market share of 26.8% in 2017. The top three players of the Europe market for multi-parameter patient monitoring equipment is expected to witness an intense competitive scenario, the top three companies namely Nihon Kohden, GE Healthcare, and Philips Healthcare held a share of around 70.6% in the global multi-parameter patient monitoring equipment market in 2016. Product development is a key methodology embraced by them and other core players in this fundamentally oligopolistic market.
