The global Multibeam Sonar market was valued at 165.52 Million USD in 2021 and will grow with a CAGR of 5.4% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Multibeam sonar is a common offshore surveying tool that uses multiple sound signals to detect the seafloor. Because of its multiple beams it is able to map a swath of the seabed under the ship, in contrast to a single beam sonar which only maps a point below the ship. With the capability to cover 100 per cent of the seafloor, multibeam sonars are becoming the industry standard for hydrographic and geological applications. Globally, the Multibeam Sonar industry market is concentrated as the manufacturing technology of Multibeam Sonar is relatively matures than some high-tech equipment. And some enterprises, like Kongsberg, Teledyne, Wartsila, Klein Marine Systems, Trittech, iXblue, etc. are well-known for the wonderful performance of their Multibeam Sonar and related services. Top 10 manufacturers accounted for about 65% market share. At the same time, North America, occupied 30.12% sales market share in 2019, is remarkable in the global Multibeam Sonar industry because of their market share and technology status of Multibeam Sonar.
