## Abstracts

The global N-Dimethylacetamide market was valued at 22 Million USD in 2021 and will grow with a CAGR of 2.09% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

N-Dimethylacetamide (DMAC) is a colorless, high boiling, polar, hygroscopic liquid. DMAC is a good solvent for a wide range of organic and inorganic compounds and it is miscible with water, ethers, esters, ketones and aromatics compounds. It is used in the production of polyacrylonitrile and polyurethane based fibers, films and coatings. The polar nature of DMAC enables it to act as a combined solvent and reaction catalyst in many reactions producing high yields and pure product in short time periods. First, in terms of consumption, the N-dimethylacetamide was 162686 MT in 2016. And it is anticipated to reach 196577 MT by 2023. Overall, the N-dimethylacetamide products performance is positive. Second, N-dimethylacetamide has a high concentration. The top six companies account for more than 70.47% of market share in 2016. DuPont, BASF, Shandong Jinmei Riyue Industry and Zhejiang Jiangshan Chemical are the tycoons of N-dimethylacetamide. DuPont is the largest manufacturer, with the market share of 20.05% in 2016. Third, in terms of application, N-dimethylacetamide can be applied in pharmaceutical industry, fiber industry, plastic industry, cosmetic industry and organic synthesis, etc. Fiber industry accounted for the largest market with about 33.15% of the global consumption for N-dimethylacetamide in 2016. Forth, under the

influence of raw material, market competitions and economic conditions, the price of N-dimethylacetamide is also unstable. The price of N-dimethylacetamide was 1236 USD/MT in 2016. And we predict that price will show fluctuation in the following years. As competition intensifies, prices gap between different types will go narrowing.
