The global Nanozirconia market was valued at 73.95 Million USD in 2021 and will grow with a CAGR of .21% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Nano zirconia, also ZrO₂ nanoparticle, is white powder of high purity; Composite zirconia refers to the composites of zirconium oxychloride and rare earth. According to the different formulations, the proportion of rare earth in the composites always changes. Yttrium oxide is most popular rare earth used in the composite, others also include lanthanum oxide and cerium carbonate and so on. Nano-zirconia industry has high technology barrier and is technology intensive industry. Currently, there are several producing companies in the world nano-zirconia industry. The main market players are Daiichi Kigenso Kagaku Kogyo, Saint-Gobain, Tosoh, Orient Zirconic, Kingan and Solvay. The production of nano-zirconia will increase to 29709 MT in 2016 from 24206 MT in 2011 with average growth rate of 4.19%. Global nano-zirconia capacity utilization rate remained at around 70.39% in 2015. In consumption market, the global consumption value of nano-zirconia increases with the 1.36% average growth rate. Europe and Japan are the mainly consumption regions due to the bigger demand of downstream applications. In 2015, these two regions occupied 61.20% of the global consumption volume in total. Nano-zirconia has two industrial manufacturing methods, which include hydrothermal method and precipitation method. And each type has

characteristic relatively. With good performance of nano-zirconia, the downstream application industries will need more nano-zirconia products. So, nano-zirconia has a huge market potential in the future. Manufacturers engaged in this industry are trying to produce high purity and good performance nano-zirconia through improving technology.
