The global Naphthenic Base Oil market was valued at 2055.29 Million USD in 2021 and will grow with a CAGR of 4.11% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Naphthenic base oil is hydro-treated group V base oil obtained through distillation of sweet crude. They possess low pour point, low wax content, and excellent swell properties. Naphthenic base oils also provide better low-temperature performance than paraffinic oils, which makes them ideal for formulating hydraulic fluids and automatic transmission fluids. Naphthenic oils respond well to antioxidants and additives due to high solvency power. The global naphthenic base oil market is rising moderately in the recent years and going forward it is likely to progress this way. The growth of the naphthenic base oil market is primarily attributed to the favorable physical properties of naphthenic base oil that makes it ideal for several formulations such as for gear oil, process oil, plasticizers, adhesives & sealants, and oil expender polymers. These end products are further used in various end-use industries such as automotive and industrial applications.
