The global Natural & Synthetic Graphite market was valued at 96.8 Million USD in 2021 and will grow with a CAGR of .29% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Natural & Synthetic Graphite is a very common mineral, soft native carbon, occurring in black to dark-gray foliated masses, with metallic luster and greasy feel: used for pencil leads, as a lubricant, and for making crucibles and other refractories; plumbago; black lead. The global production of natural & synthetic graphite increases to 1072 K MT in 2016 from 1054 K MT in 2012, at a CAGR of less than 0.75%. In 2016, the global natural & synthetic graphite market is led by China, capturing about 70% of global natural & synthetic graphite production. India is the second-largest country market with 7% global Share. Natural & synthetic graphite market change a lot in the past few years in China, the average price of natural graphite was about 330\$/MT in 2009, but it increased rapidly up to about 940\$/MT in 2010-2011, because of the large volume and rapid growth of export and downstream demand, the graphite after 2012. Then, it kept declining since 2011 while the refractories market began to decrease and the government got to limit to mine, the price was just about 520\$/MT in 2014.10. The Chinese production of natural graphite kept increasing in 2010-2013, especially in 2013, the production growth rate reached 7% though the price declined by more than 12.6%. It is said that the mine of graphite even increased by more than 30% in Jixi,

Heilongjiang one of the largest graphite market in China. The capacity became grave oversupply at the same time. In 2014, government constraint policy came into working, and the mine got the efficacious restraint. The market is expected to be normalization in next years. In the past five years, China mainly exported the primary processed graphite with the share of more than 40%, about 140 K MT each year, of the total production by low price, while imported high-end product from Japan, USA and Germany by very high price, which was even dozens of times more than the export price. Now, China has turn to the deep-process of the graphite. Some new projects come into work in these years. And China begins graphite overhaul in 2017, it may lead the Chinese export to expand in the near future. Natural & synthetic graphite downstream is wide and recently natural & synthetic graphite has acquired increasing significance in various fields of Refractories, Metallurgy, Parts and components, Batteries, Other. Globally, the natural & synthetic graphite market is mainly driven by Refractories and Metallurgy market which account for nearly 66% of total downstream consumption of natural & synthetic graphite in global in 2016. Based on types of natural & synthetic graphite available in the market, the report segments the market into Natural Graphite, Synthetic Graphite. The Natural Graphite market accounted for the largest market share in 2016, mainly owing to its` low price structure. At present, the major manufacturers of natural & synthetic graphite are South Sea Graphite, Haida Graphite, Yixiang Group, BTR, National de Grafite, Northeast Asia Mineral Resources, Aoyu Graphite Group, Xincheng New Material, SGL, Tiansheng Nonmetal Ind, etc. The top five of them is holding about 41% sales market share in 2016.
